

Jaco Van Dyk

Instructional Designer and Co-educator

Instructional Designer and Homeschool co-educator who has created interactive learning environments and provided consistent educational and emotional support to a young boy, working alongside Anuscha van Niekerk since 2023. Jaco brings Natural Sciences, Technology, and History to life through museum visits and historic sites, building understanding around real places and objects rather than a textbook alone. He also introduces the child to technology directly, and supports the family's daily mobility, including transport to lessons, outings, and appointments. Alongside this, Jaco has played a key role in strengthening the child's confidence and emotional wellbeing.

My background is in instructional design and multimedia, that I bring directly into the classroom. I am also well versed in Visual Effects, Compositing, 2D & 3D Animation, Unreal Engine 5, Blender, Unity and AI-driven animation & motion capture workflows that is high demand skills. I create interactive 3D models the children can rotate and manipulate, pre-record video explanations with Anuscha, and a custom digital educational app I built and maintain.

I am applying alongside Anuscha as a Homeschooling Teaching Couple. Over the past three years, we have come to love the homeschooling environment and the memorable trips we share with the children. We are excited about our next adventure with a new family.

CORE COMPETENCIES

• Hands-On Subject Teaching

Lesson planning alongside Anuscha and teaching the practical parts of Natural Sciences, Technology, and History through models, demonstration, field investigations, and museum or destination visits. Also responsible for physical education and cooking lessons.

• Instructional design & EdTech

Built and maintains custom educational app with 3D-models that can be interacted with. by rotating objects or taking them apart. This gives visual demonstration that is custom designed for our teaching style. Ability to create any real object in animation studios that are commonly used today, then add it to our app.

• Mobility, Support & Continuity

Trip research and filming for travel-based lessons, hardware/software maintenance, and recording lessons so learning continues uninterrupted if a child is sick or the family is between locations.

AVAILABILITY

- Available from January 2027
- Current Location: Gauteng, South Africa
- Open to relocation for long term assignment
- Valid South African Passport
- Wold schooling & travel-based families welcome
- Police Clearance IN PROGRESS (end of October 2026)

EDUCATION

- **National Certificate in 3D Animation & Visual effects**, Open window Institute, 2018
- **TEFL Certificate**, Udemy, 2026
- **Code C1 Driving License**, valid to drive in UK and Europe
- Paediatric First Aid, Pretorius Institute of Medical Excellence, IN PROGRESS (end of October 2026)

LANGUAGES

- English, Fluent
- Afrikaans, Fluent
- French, Learning

SKILLS

- Instructional design practice — since 2018
- Interactive learning modules (Storyline, Rise 360)
- 3D animation & visual explanation
- Digital educational app development & maintenance
- Trip research, filming & destination lessons
- Sports educator — nine years MMA & self-defence
- Advanced Computer Hardware and Software Skills (Microsoft)

INTEREST

- Hiking and Camping
- Traveling and Videography
- 3D Scanning and VR Technology
- Creating Documentaries
- Caring for Family Pets
- Cooking and Fitness

WORK EXPERIENCE

Homeschool Co-Educator & Subject Teacher | Alongside Anuscha Van Niekerk, private family household, May 2023 - Present

- Teach the practical content in Natural Sciences, Technology and History through investigations, experiments, project building (physical and digital) and real life experiences.
- Research and review destination lessons before every outing so the trip meets the lesson's goal, and film each one for review or if the child is ill and cannot attend the lesson.
- Sports educator for the children's physical education, events and outdoor days. I also run household errands, shopping, cooking and transport.
- Built and maintain a custom digital education app with tools to make learning and teaching more mobile and convenient for both teachers and students. The app uses 3D-models that can be interacted with
- House and pet sitting for family when they are away. Taking children on outings including restaurants, theatre, carnivals, racing tracks and hikes. Occasionally cooking for family.

Instructional Designer & Senior Multimedia Designer | The Boiler Room (Pty) Ltd, 2023 - Present

- Design interactive learning modules in Articulate Storyline and Rise 360; produce animation and visual explanations that make geography, history, science and architecture understandable.
- Use AI-assisted image and video tools to build custom lesson content faster; automate routine production and keep systems working when connectivity is poor.

Graphic Designer — eLearning | DevCom Strategic Communication, 2021 - 2022

- Design interactive learning modules in Articulate Storyline and Rise 360; produce animation and visual explanations that make geography, history, science and architecture understandable.
- Use AI-assisted image and video tools to build custom lesson content faster; automate routine production and keep systems working when connectivity is poor.

Freelance Multimedia Designer | Independent practice (video intern, Astral Entertainment, 2019), 2016 - Present

- More than 20 end-to-end projects in branding, animation and video; VR education environments with characters and themed spaces, ready to show.
